

MEMORANDUM

METHODIST The Pathology Center

September 21, 2015

Dear Providers,

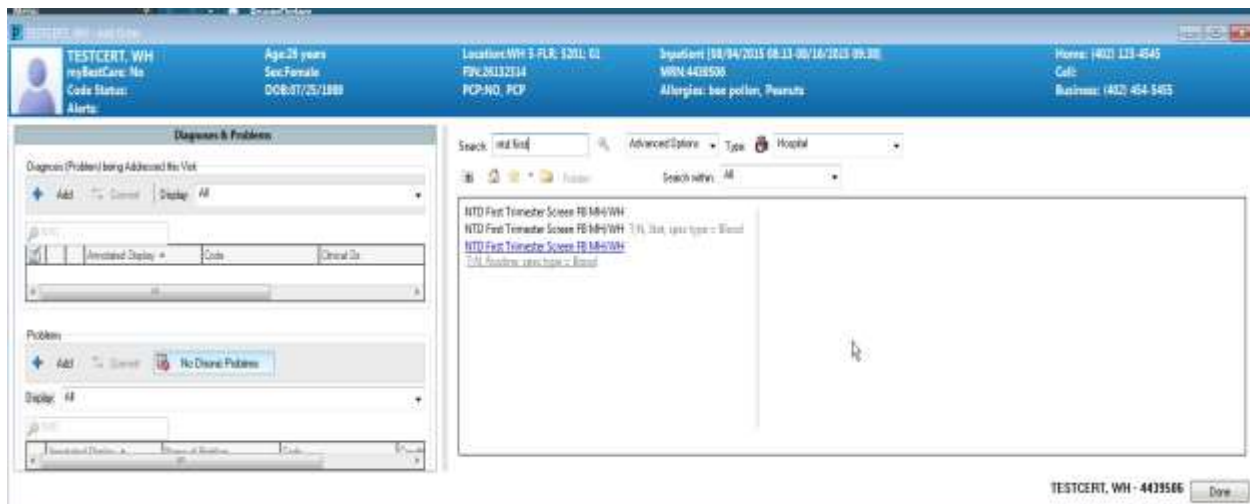

The interface for the NTD First Trimester Screen went live on September 16th.

The order name has changed slightly it was called NTD Ultra Screen and now will be ordered as the following: We have attached a view from Power Chart.

NTD First Trimester Screen FB – MH/WH.

The report will have a different look and we have received some feedback. In order to have the test interfaced, we have a few limitations in how the results can display in Cerner. The results are sent from the reference lab (Perkin Elmer) as comments so that is how they display in Cerner. The report can be located in PowerChart under Inpatient Labs and Special Tests.

Eventually, the report will come across as a PDF file/report but that is future functionality for Perkin Elmer and Cerner.

Please feel free to contact our Client Services Department if you have any questions at 402-354-4541.

Sincerely,

Methodist Hospital Pathology Center
